

Build your dreams with authentic clay pavers

Durable • Colorfast • Sustainable

PINE HALL BRICK

AUTHENTIC CLAY PAVERS

Design: Groundworks Studio; photo: Matthew Benham. Pathway Red and Pathway Cocoa

Here's what makes our clay pavers so great.

Pine Hall Brick pavers have a wide range of colors with great aesthetic appeal that create hardscapes for both modern and historic settings. Homeowners covet clay pavers because they are authentic brick. Designers and architects value the latitude to fit them into almost any design.

- Durability – clay pavers withstand generations of use in the most demanding environments.
- Colorfast – our pavers never fade, because the color is integral to the molding and firing process.
- Extreme Weathering—Pine Hall Brick clay pavers greatly exceed the most rigorous Freeze-Thaw test in the paving industry.
- Strength – we make our pavers to the demanding specification of 12,000 psi average compressive strength.
- Sustainability – clay pavers are formed from two of the most basic materials there are: dirt and water. They last for generations and can also provide permeable surfaces to protect the environment from water runoff.

Since 1922, Pine Hall Brick has continuously developed new and better ways to manufacture clay pavers. At our state-of-the-art facilities, we produce thousands of pavers daily.

Family owned with plants in North Carolina and Georgia we are a business dedicated to defining the standard of segmental paving with America's Premier Paver™.

PINE HALL BRICK

AUTHENTIC CLAY PAVERS

For your backyard

A great outdoor living space enhances the beauty, function and value of any home. Your dream backyard starts with authentic clay pavers from Pine Hall Brick.

Rumbled Colonial Red with Rumbled Siesta border

For your driveway

Strong. Durable. Colorfast. Make a statement with a clay paver driveway. They are virtually maintenance free and don't need expensive sealers to look good over time. Decades from now they will look as good as the day they were installed.

For your interior

Our 3/8" thick PaverTiles allow the homeowner to bring the beauty and authentic appeal of clay pavers indoors.

Do It Yourself

For the DIYer

Perfect for the weekend warrior who wants to rehab an ugly concrete slab or create a patio from scratch. Pine Hall Brick has the products and knowledge to help make your work look great.

English Edge Burgundy

Beveled Edge Pavers

English Edge and Georgian Edge pavers both have beveled edges and spacer bars for a crisp look that installs with ease. Beveled edge pavers are available in standard 4" x 8" by 2.25" thickness, as well as 2.75" thickness for heavy vehicular applications. Beveled edge pavers are recommended for driveways and other vehicular applications.

Old Mill pavers

Old Series Pavers

Here's another take on "timeless" with our specially cut antique edge pavers that pay tribute to early American structures and streets. Old Series pavers feature antique edges and surface texture for a rustic appearance in unique colors. Old Series pavers are suitable for light vehicular applications with appropriate spacing.

Rumbled StormPave™ Heavy Duty Autumn

StormPave™ Water Permeable Pavers

StormPave™ is an amazing breakthrough in water permeable paving. StormPave clay pavers have beveled edges and large spacer bars that allow rain to filter between washed aggregate in the joints to a specially constructed catchment area underneath the pavers. The water then dissipates naturally into the native soils. StormPave pavers are available in standard 4" x 8" by 2.25" thickness as well as 2.75" thickness for heavy vehicular applications. For more information, go to pinehallbrick.com/permeable

New Products

Plymouth Tumbled Modular Paver

A true tumbled paver, Plymouth Tumbled Modular paver is 7-5/8" by 3-5/8" by 2-1/4" thickness. It can be laid both with mortar or with sand in a running bond or chevron pattern.

PaverTiles

PaverTiles are 3/8" thick tiles made from our authentic clay pavers. Perfect for indoor use in kitchens and mud rooms or outdoor applications that can't accommodate a thicker paver. All of Pine Hall Brick's pavers are available as PaverTiles.
