

Lee Building Products

Certified PFAS Safe

At Lee Building Products, product safety is our top priority. Our commitment to providing you with the best starts with using the highest quality components in the world and extends to rigorous testing procedures, ensuring our artificial grass products are completely safe.

Our artificial turf yarns and backing undergo stringent testing and analysis, conducted by accredited third-party laboratories specializing in chemical analysis to ensure safety and non-toxicity.

The following industry standard tests have determined Artificial Turf Supply's artificial grass products are per- and polyfluoroalkyl substances (PFAS) safe and are in compliance with industry regulations and our commitment to customer safety.

TEST METHODS

-Perfluoroalkyl and polyfluoroalkyl substances (PFAS) Content
