MOUNTAIN STONE[®]

MANUFACTURED STONE

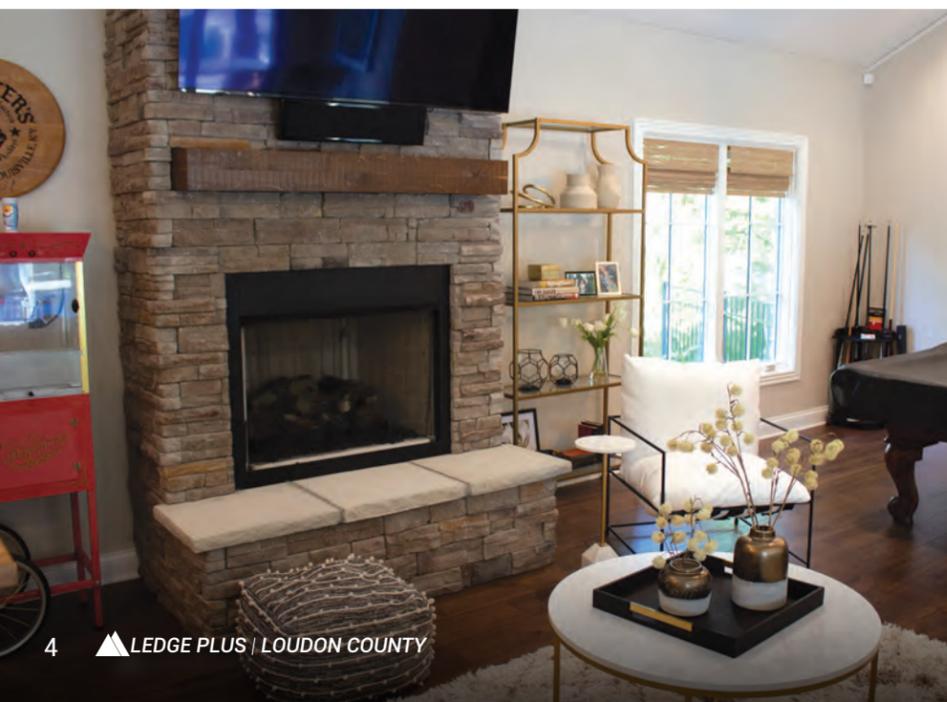

BUILT TO LAST

QUALITY, DURABILITY & CAREFUL CRAFTSMANSHIP

Mountain Stone[®] is manufactured in Bowling Green, KY with distribution and sales through many dealers across the United States. We take pride in the craftsmanship and delicacy that is put into our stone. Molded to capture all the nooks and crannies, sedimentary lines and dimples of natural stone, this stone is sure to impress. Our talented and hard working production and management teams ensure that Mountain Stone maintains high standards and quality products. Those standards are carried throughout the manufacturing process and into our customer's hands.

▲ MOUNTAIN STONE MANUFACTURED STONE PROCESS & PRODUCT USAGE

HARD WORK, CAREFUL CRAFTSMANSHIP & CAPTURING NATURE'S BEST

Mountain Stone® manufactured stone begins with individual natural stones that are used as "masters". From those masters we create molds that capture the essence of each stone.

Textures, shapes and each individual characteristic of the natural stone is captured within the new molds. When your eyes or hands cannot tell the difference between natural and

Mountain Stone manufactured stone, you know that the product has been created with the highest quality and made as nature intended.

Why Mountain Stone?

- Beautiful, character-rich stone styles
- Ease of use & installation
- Versatile enough for use on a wide variety of applications
- Can be used on interior & exterior projects

PRODUCT USAGE WHERE CAN IT BE USED?

MOUNTAIN STONE HAS SUCH VERSATILITY THAT IT CAN BE USED FOR INTERIOR, EXTERIOR, RESIDENTIAL OR COMMERCIAL PROJECTS

Apply this stone to your outdoor spaces such as fireplaces, fire pits, outdoor kitchens and islands or around the poolside. Columns, posts, neighborhood entrance signs and garden seat walls are also great exterior projects with Mountain Stone®.

For interior uses, update your fireplace, kitchen island, bar area, wine cellar or an accent wall!

Commercially or residentially, update a kitchen wall space, breakfast or common area to add visual appeal and warmth for your guests.

With so many profiles, textures, shapes and colors, you are sure to find a perfect fit with Mountain Stone® manufactured stone.

For many decades Mountain Stone® has been a trusted and affordable choice for home owners, builders, developers and architects.

▲ MOUNTAIN STONE CLASSIC SERIES

CLASSIC SERIES

As mentioned before, Mountain Stone® manufactured stone begins with individual natural stones that are used as “masters”. From those masters we create molds that capture the essence of each stone.

As the product is pulled from the molds, it is already shaped and sized in the most true shape and detail at around 1.5” thick, which is known as the Classic Series stone.

Also referred to as adhered veneer, the Classic Series thickness differentiates from the premium Builders Series stone. The Builder Series stone is around 3” thick and referred to as anchored veneer.

Our talented and hard working management and production team ensures that Mountain Stone can maintain high standards and quality products. Those standards are carried through production and into our customer service.

Actual product color may vary. We recommend reviewing product samples before making final color selections. All Mountain Stone and Veneerstone products are CMHA certified and comply with ASTM C1670/C1780. *Some colors are considered premium based on availability and cost increases of manufacturing materials.

MOUNTAIN STONE BUILDER SERIES

BUILDER SERIES

The Builder Series stone, also known as anchored veneer, is a full bed-depth building stone. This means that it will be thicker than the Classic Series stone. Product thickness varies depending on profile and ranges from 3-4 1/2". The design of this product benefits the mason, as it is installed on typical, traditional foundation like brick or stone and "anchored" hence the name anchored veneer.

Overall, with this formulated and consistent size there is considerably less material waste when compared to natural stone, which does not normally course and bond as easily.

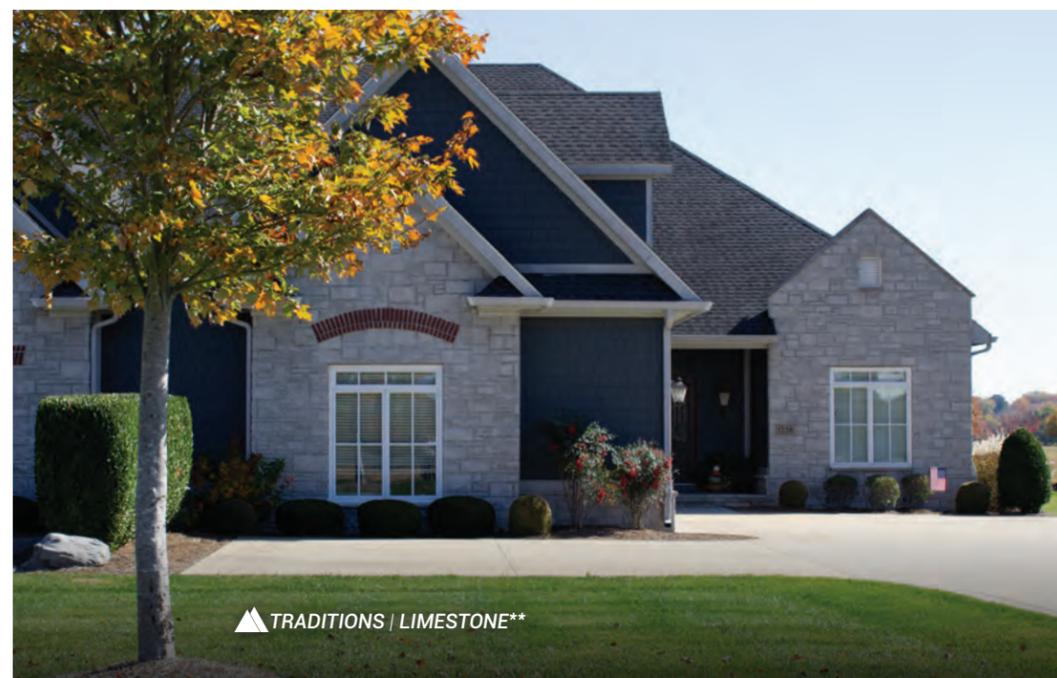

Each stone is hand-crafted and sized appropriately and consistently, where natural stone is not. As a result, the Mountain Stone® Builder Series stone, at half the weight as natural stone, installs faster and easier! This quality creates less work for the stone mason.

Actual product color may vary. We recommend reviewing product samples before making final color selections. All Mountain Stone and Veneerstone products are CMHA certified and comply with ASTM C1670/C1780. *Some colors are considered premium based on availability and cost increases of manufacturing materials.

CAPTURING THE CHARACTER OF NATURAL STONE

Have you really looked at natural stone? Each stone has an element of elegance and beauty that is unique to that stone. Diverse textures, colors, shapes and sizes, natural stone is absolutely stunning.

By using hot melt molds, we create intricate, detailed manufactured stone molds from natural stone pieces. Duplicates are made from these molds and then manufactured.

During the manufacturing process our talented team mixes pigments and hand paints them into each stone mold. This process give our stone that hand-touched, crafted quality.

Our goal at Veneerstone is to capture the character of natural stone, yet keep it affordable, lighter weight and practical for contractors, architects, landscaping professionals, home and business owners.

VENEERSTONE—ADAPTABLE FOR ANY TYPE OF PROJECT

Whether it is residential, commercial, outdoor or indoor, our stone can be used on various platforms. Veneerstone will enhance your outdoor dream space such as fireplaces, kitchens, pillars, columns, walls, porches and more!

The entrance and outside appearance of your home or business is also important. Our stone can add more visual appeal whether it is on the driveway entry, columns with caps,

signage to neighborhoods or on the front of your home or business.

For interiors use Veneerstone to build an accent wall in a main entry, bar area, living room, bedroom or wherever your heart desires. Fireplaces, hearths and mantles can also warm up any area. Why not add some beautiful stone to cozy it up?

WARRANTY

Mountain Stone® and Veneerstone™ both carry a 50-year limited warranty when used on structures that conform to all local building codes. Material must be installed according to manufacturer's instructions. Warranty is limited to replacement of defective materials only and does not cover labor to remove or replace stone.

Warranty does not cover damage resulting from building settlement, wall movement, contact with chemicals or paint, discoloration due to airborne contaminants or stains caused by material applied to or allowed to come in contact with stone. Warranty is non-transferable and is limited to the original purchaser. ©2026 Mountain Stone® & Veneerstone™. All Rights Reserved.

VENEERSTONE
Makers of Premium Manufactured Stone

INDUSTRY REFERENCES

- ASTM C 39 - Standard Test Method for Compressive Strength of Cylindrical Concrete Specimens.
- ASTM C 177 - Standard Test Method for Steady-State Heat Flux Measurements and Thermal Transmission Properties by Means of the Guarded-Hot-Plate Apparatus.
- ASTM C 192 - Standard Practice for Making and Curing Concrete Test Specimens in the Laboratory.
- ASTM C 482 - Standard Test Method for Bond Strength of Ceramic Tile to Portland Cement.
- ASTM C 1670 - Standard Manufacturer Specification for Adhered Manufactured Stone Masonry Veneer Units.
- ASTM C 1780 - Installation Guide & Detailing Options for Adhered Manufactured Stone Veneer.
Visit <https://ncma.org/resource/msv-installation-guide/> for official ASTM C1780 Compliant Installation Guide.
- UL 723 - Standard for Safety for Surface Burning Characteristics for Building Materials.

WARNING: Concrete veneer contains Crystalline Silica (quartz) and traces of other hazardous substances which are released as dust and can be inhaled when dry-cutting, drilling, or shaping the product. Crystalline Silica is a chemical known to the State of California to cause cancer, birth defects, and other reproductive harm. Use appropriate safety precautions.

Product Profiles on Back Cover: (Left to Right): Veneerstone Pacific Ledge Profile in color Genoa*; Mountain Stone Stack Stone Profile in color Antique Grey; Veneerstone Imperial Stack Profile in color Silver

Actual product color may vary. We recommend reviewing product samples before making final color selections. All Mountain Stone and Veneerstone products are CMHA certified and comply with ASTM C1670/C1780. *Some colors are considered premium based on availability and cost increases of manufacturing materials.
